Tools you can use...

[Search the Web](#)

Popular and more academic search engines, the Invisible Web, reviews, tutorials and more

[MedlinePlus Guide to Healthy Web Surfing](#)

What should you look for when evaluating the quality of health information on Web sites? Here are some suggestions based on the experience of health information experts.

[Public Library Databases](#)

Your local Pennsylvania public library provides free access to a broad selection of databases. Select your county from the list and then select your public library from the list of libraries. (You will need a library card number to access these resources.)

Recommended books for your reference library:

American Hospital Association Hospital Statistics (annual with CD-ROM)

Diagnostic and Statistical Manual of Mental Disorders DSM-IV

ICD 10: International Statistical Classification of Diseases and Related Health Problems

Mosby's Medical, Nursing, & Allied Health Dictionary (8th edition)

Physicians' Desk Reference PDR (63rd ed.)

Special Search Engines for Medicine and Health Research

[Hardin MD](#)

Maintained by the Hardin Library for Health Sciences at the University of Iowa, Hardin MD's purpose is to provide easy access to comprehensive resource lists in health related subjects. Lists that are in Hardin MD are checked regularly to see that they are being well maintained. Access to the database is arranged by subjects and links to lists are provided under the subject headings. This site subscribes to the [HONcode principles of the Health on the Net Foundation](#).

[HealthFinder .gov](#)

Healthfinder.gov is coordinated by the [Office of Disease Prevention and Health Promotion \(ODPHP\)](#) and its health information referral service, the [National Health Information Center](#). Since 1997, healthfinder.gov has been recognized as a key resource for finding the best government and nonprofit health and human services information on the Internet. healthfinder.gov links to carefully selected information and Web sites from over 1,600 health-related organizations.

[HealthLine](#)

Healthline Networks offers the easiest way for consumers to quickly and easily find consistently excellent health information on the Web.

[MDLinx](#)

MDLinx is an award-winning, practical tool that busy physicians, healthcare professionals, and a growing number of educated consumers use to stay up to date with the latest research in the medical field. The company aggregates medical articles and research from more than 1,200 peer-reviewed journals and leading news media on a daily basis. Our physician editors sort this content into 32 medical specialty sites, 36 patient sites, and more than 743 subspecialty sections, all available online. Users can choose to view this information online or subscribe to any of our 743 daily newsletters.

[My Optum Health.com](#)

My Optum Health.com is a comprehensive, well-integrated health and medical resource developed by health care professionals. This site aims to improve health care by empowering consumers with the online health programs, information and technology that help them make healthy lifestyle changes for themselves and their families.

[OmniMedical Search](#)

Search up to 12 different medical search engines at one time. Focus your search using the dropdown menu on the home page; in addition, OmniMedicalSearch has tabbed search options for more medical search information: News, Images, and Web2, which searches only specific domains among four major search engines.

[PubMed Journals Database](#)

A service of the National Library of Medicine, search by topic, journal title or abbreviation, or browse by [subject terms](#).

[WebMD](#)

WebMD is a great one-stop medical information site. WebMd also has a lot of interesting interactive calculators, quizzes, and other entertaining content that helps you understand medical information a bit easier.
