Customized Training from Industry Experts

As one of only six ABET accredited plastics programs in the United States, Penn College leverages academic expertise to deliver custom training to companies and their employees around the world. What results are training programs and annual international workshops that feature cutting-edge methodologies and technical knowledge to help plastics manufacturers excel.

Customized training is available to companies in every major manufacturing process. Let our team of industry experts craft solutions to meet your skill development needs.

The Next Level of Training

Global Standards for Plastics Certification (GSPC) goes well beyond traditional applications of training by combining computer-based technical training with in-house technical and company-specific process training. The program integrates standardized technical learning and safety with a company’s processes and procedures leading to a single platform for a comprehensive yet simple to implement training system.

Building knowledge specific to your company’s operations and procedures ensures maximum return on your investment and reinforces consistency throughout your organization. GSPC has been independently proven to result in positive ROI across multiple metrics. Call us to learn more at 570-321-5533.
Out-of-the-box plastics training courses:

- Injection Molding Processing I
- Injection Molding Processing II
- Injection Molding Troubleshooting
- Heavy-Gauge/Cut-Sheet Thermoforming
- Thin-Gauge/Roll-Fed Thermoforming
- Rotational Molding
- Blow Molding
- Extrusion Introduction and Stretch Blow Molding
- Color Science
- Plastic Materials, Processing, and Testing
- Extrusion Maintenance
- Extrusion: Introductory Sheet and Profile
- Extrusion: Polycarbonate
- GSPC for
  - Injection Molding
  - Extrusion
  - Extrusion Blow Molding

Other courses commonly requested by plastics companies:

- Hydraulics & Pneumatics
- Industrial Electrical Series
- Programmable Logic Controllers (PLC)
- Root Cause Analysis
- Six Sigma
- Statistical Process Control
- Welding I & II

Many other training topics are available - all are customizable.
