

## **PENN COLLEGE**

### **DIESEL PERFORMANCE CLUB**

### **Message from the Club:**

Aptly named "Accelerated Learning," Pennsylvania College of Technology's 1959 B-61 Model Mack drag truck has been a valuable extracurricular experience, complementing the academic curriculum and providing real-world experience for tomorrow's workforce. With over 25 years of combined effort from alumni, industry partners, and students, recent Diesel Performance Club members aimed to compete with the fastest trucks in the East. After two years of competition, they achieved their goal of reaching 100 mph.

This past academic year, the club visited Beaver Springs, Numidia, Maple Grove, and Island Dragway. After modifications, we developed 869 rear-wheel horsepower and 8018 ft/lbs of rear-wheel torque. The 12,000 lb Mack and driver, TJ Buck, ran its fastest pass of 13.30 at 106 mph! Our current focus includes exhaust system efficiency and rear suspension modification.

We are grateful for the support from alumni, faculty, and industry partners. Donations of materials, tooling, and supplies help our team compete nationally. We invite you to help us continue "Accelerated Learning" at Penn College.
