

BECOME A CERTIFIED IDL PROFESSIONAL.

International Residential Code (IRC) requires blower door and duct leakage testing on all new construction and major home renovations, yet certified professionals are in short supply. Earn one of the most in-demand certifications in the construction industry and open your business to a world of opportunity.

The **BPI Infiltration and Duct Leakage (IDL) training and certification** is a simple and affordable way for builders, remodelers, HVAC, insulation, and other contractors to gain the skills needed to offer duct leakage and blower door tests in compliance with IECC codes.

WHAT YOU'LL LEARN

- ◇ IRC / IECC codes related to duct leakage
- ◇ Construction math
- ◇ Duct leakage and blower door testing in accordance with ASTM standards
- ◇ Practice and prepare for the BPI IDL certification field exam

EARN THE CREDENTIAL

The ninety-minute, hands-on BPI IDL field exam entails conducting duct leakage tests to the ASTM E1554-07 standard and blower door tests to the ASTM E779 standard.

BPI is the nation's premiere certification and standards-setting organization for building performance professionals. Earning the BPI IDL certification reflects your commitment to safe and quality home construction.

A TRUSTED TRAINING PROVIDER

We teach energy efficiency rooted in building science. The Clean Energy Center at Penn College is a nationally-recognized training center and BPI Test Center with over three decades of experience providing training and technical assistance to home energy professionals, commercial building operators, government, utility companies, and other industry partners in the building performance field.
