

MULTIFAMILY BUILDING ANALYST CREDENTIAL.

Certified multifamily building analysts are in demand now more than ever. Find your niche as a multifamily building analyst and take your business to the next level.

The Clean Energy Center's **BPI Multifamily Building Analyst course** prepares learners to earn the nationally recognized **BPI Multifamily Building Analyst** credential. This course teaches the fundamentals of building science and energy auditing requirements specific to multifamily housing. Prior experience in building performance or an HVAC-related field is recommended.

WHAT YOU'LL LEARN

- ◇ Principles of building science
- ◇ Best practices for conducting an audit
- ◇ Inspection and diagnostic skills
- ◇ Quantifying energy efficiency measures
- ◇ Current health and safety standards

EARN THE CREDENTIAL

BPI is the nation's premiere certification and standards-setting organization for building performance professionals. Candidates must successfully challenge both an online and a field exam to become Multifamily Building Analyst certified. BPI Multifamily Building Analysts must recertify every three years.

A TRUSTED TRAINING PROVIDER

We teach energy efficiency rooted in building science. The Clean Energy Center at Penn College is a nationally-recognized training center and BPI Test Center with over three decades of experience providing training and technical assistance to home energy professionals, commercial building operators, government, utility companies, and other industry partners in the building performance field.
